Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1-14 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6620047. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to claim the gaming machine broader in order to obtain the most commercially viable form of invention or in order to obtain the broadest protection for invention for securing commercial viability. Essentially, the omitted language pertaining to 'comprises data that' (clm 1 herein in comparison with either clm 3 or 5 of Patent), value dispensing mechanism (clm 10 of Patent), touch-sensitive device (clm 10 of Patent) and second application programming device (clm 10 of Patent) limited the invention and thus by omitting the language, a broader form of invention is claimed which secures broader protection for commercial viability. Also a disk memory is known to be a read/write memory.

Art Unit: 3714

Allowable Subject Matter

2. The claimed invention is broader; however, appears to claim patentable matter for similar reasons for which parent application, 09677129, was allowed in paper mailed 11/28/01, which is incorporated herein.
